

REMARKS:

The Specification was amended to add Headings, correct spelling, and add an Abstract, to correspond to U.S. patent practice. It is believed no new matter was added.

The claims were amended to change "characterized in that" to "wherein"; to change "is obtained by polymerizing at least one monomer" to "comprises one or more monomer units" and use proper Markush group language; and to remove multiple dependencies, where present.

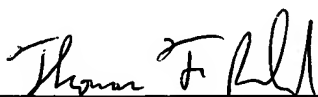

Claims 1 and 2 were amended, with support in the published PCT application (English translation) on page 3, lines 27-31 (in claim 1), and page 5, lines 32-34 (in claim 2).

New claims 15 and 16 were added to incorporate the "such as methyl methacrylate" limitation found in original claims 6 and 11.

It is believed no new matter was added by these amendments.

Examination and allowance of the new claims are earnestly solicited.

Respectfully submitted,

Thomas F. Roland
Attorney for the Applicants
